

Messy Church Does Science

Take-home ideas

You can find all web links at www.messychurch.org.uk/scienceathome.

10. Time and measurement

Try to count the hairs on someone's head. Jesus said God cares for each person so much that he knows exactly how many hairs are on your head. He knows every detail about you. Tell someone in your family how much you care about them. Tell God how much you care about them.

Experiments to do at home

- Make an anemometer to measure wind speed, such as: www.activity-mom.com/science-experiments-at-home.
- Measure how energy transfers using bouncing balls: www.sciencekids.co.nz/experiments/bouncingballs.html.

Fun on the web

- Play the layers of time game: www.amnh.org/explore/ology/paleontology/layers-of-time2.

Make a difference in the world

Try giving somebody in your family or a friend two minutes of your time completely whole-heartedly. What difference does it make?
